PROJECTS

- **Facial Recognition Attendance Management System**
  - Developed an automated attendance system using python and the tkinter library with OpenCv for real-time facial recognition.
  - The project streamlines attendance tracking by detecting and recording faces accurately, improving efficiency and reducing manual errors.
- **Tomato Food Delevering Website Using MERN**
  - Developed a full stack food delivery website "Tomato", using MERN stack implementing user authentication, restaurant listings, menu management and real-time order tracking.
  - Built responsive UI and integrated secure APIs, enabling seamless browsing, cart operations, and payment workflow for an end-to-end food ordering experience.

CERTIFICATIONS

- SQL Basic Certification from HackerRank
- HTML Basic Certification from HackerRank
